PROFESSIONAL SUMMARY

B.Tech Computer Science student focused on Full Stack Development and Software Engineering, with hands-on experience building and deploying MERN applications, REST APIs, authentication systems, and AI-integrated products. Strong foundation in Java, Data Structures & Algorithms, and backend development, with experience gained through multiple hackathons and real-world projects.

PROJECTS

Health Intelligence & Report Insights Platform

[Live](#) | [Github](#)

React.js · Node.js · Express.js · MongoDB · Tesseract OCR · Gemini AI

- Built a MERN-based health intelligence platform using Tesseract OCR and Gemini AI for report text extraction, structured health insights, and conversational analysis; achieved 90%+ OCR accuracy across 10+ tested reports.
- Developed 10+ JWT-authenticated REST APIs for user authentication, report management, history, and chatbot workflows; deployed frontend on Vercel and backend on Render.

Workflow Orchestration & Job Processing Platform

[Live](#) | [Github](#)

Next.js · TypeScript · Node.js · Express.js · Prisma ORM · PostgreSQL · Socket.IO · JWT

- Built a full-stack task processing platform with JWT authentication, RESTful APIs, PostgreSQL persistence, and CRUD-based task management, using Next.js, TypeScript, Express.js, and Prisma ORM.
- Implemented asynchronous queue-based processing and background workers with task lifecycle tracking and Socket.IO real-time updates, enabling live status and dashboard updates without manual refresh.

Financial Risk Assessment & Debt Analysis Platform

[Github](#)

React.js · Node.js · Express.js · Tailwind CSS · AI Integration

- Built a full-stack financial analysis platform with a custom 0–100 risk engine for debt stress testing, repayment comparison, and scenario-based financial assessment.
- Integrated an AI-assisted chatbot, PDF-based financial context, real-time market-value API data, and offline report generation to support interactive and data-driven financial analysis.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL | **Frontend:** React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL | **Tools:** Git, GitHub, Postman, AI/API Integration

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering 2023-2027

Sagar Institute of Research & Technology, Bhopal

CGPA: 7.81/10

ACHIEVEMENTS

- Semi-Finalist — The Economic Times GenAI Hackathon , IEEE Tech for Tomorrow Hackathon
- Top 10 — AMD Slingshot Regional Demo Day 2026, Bhopal
- Finalist — ABV-IIITM Gwalior Hacksagon, 2,100+ Participants

CERTIFICATIONS & TRAINING

- NPTEL — Python for Data Science | 71%
- AWS Educate — Cloud Fundamentals
- Backend AI Engineering Program — FlyRank | Pre-Internship / Technical Training
